BAY OF BOTHNIA
In the northern archipelagoes of the Bay of Bothnia 30-65 cm, partly rotten, fast or consolidated ice. Out of there from S Kemi to Ulkokalla, 10-50 cm very open to very close ice with ridges. Off the fast ice along the Swedish coast, open water, but a couple of large floes with 30-65 cm very close ice 10-15 M NNW Maloren.
In sheltered bays in the Skellefte bay rotten ice occurs.
Next 24 hours NW ice drift.
