

Appendix IV

Transects from the Skagerrak to the Western Gotland basin

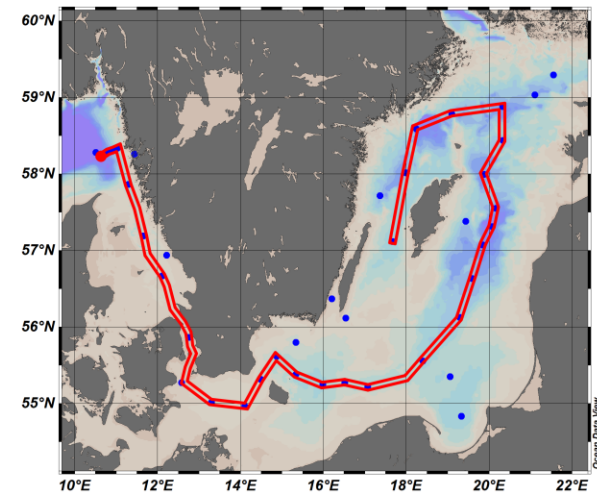

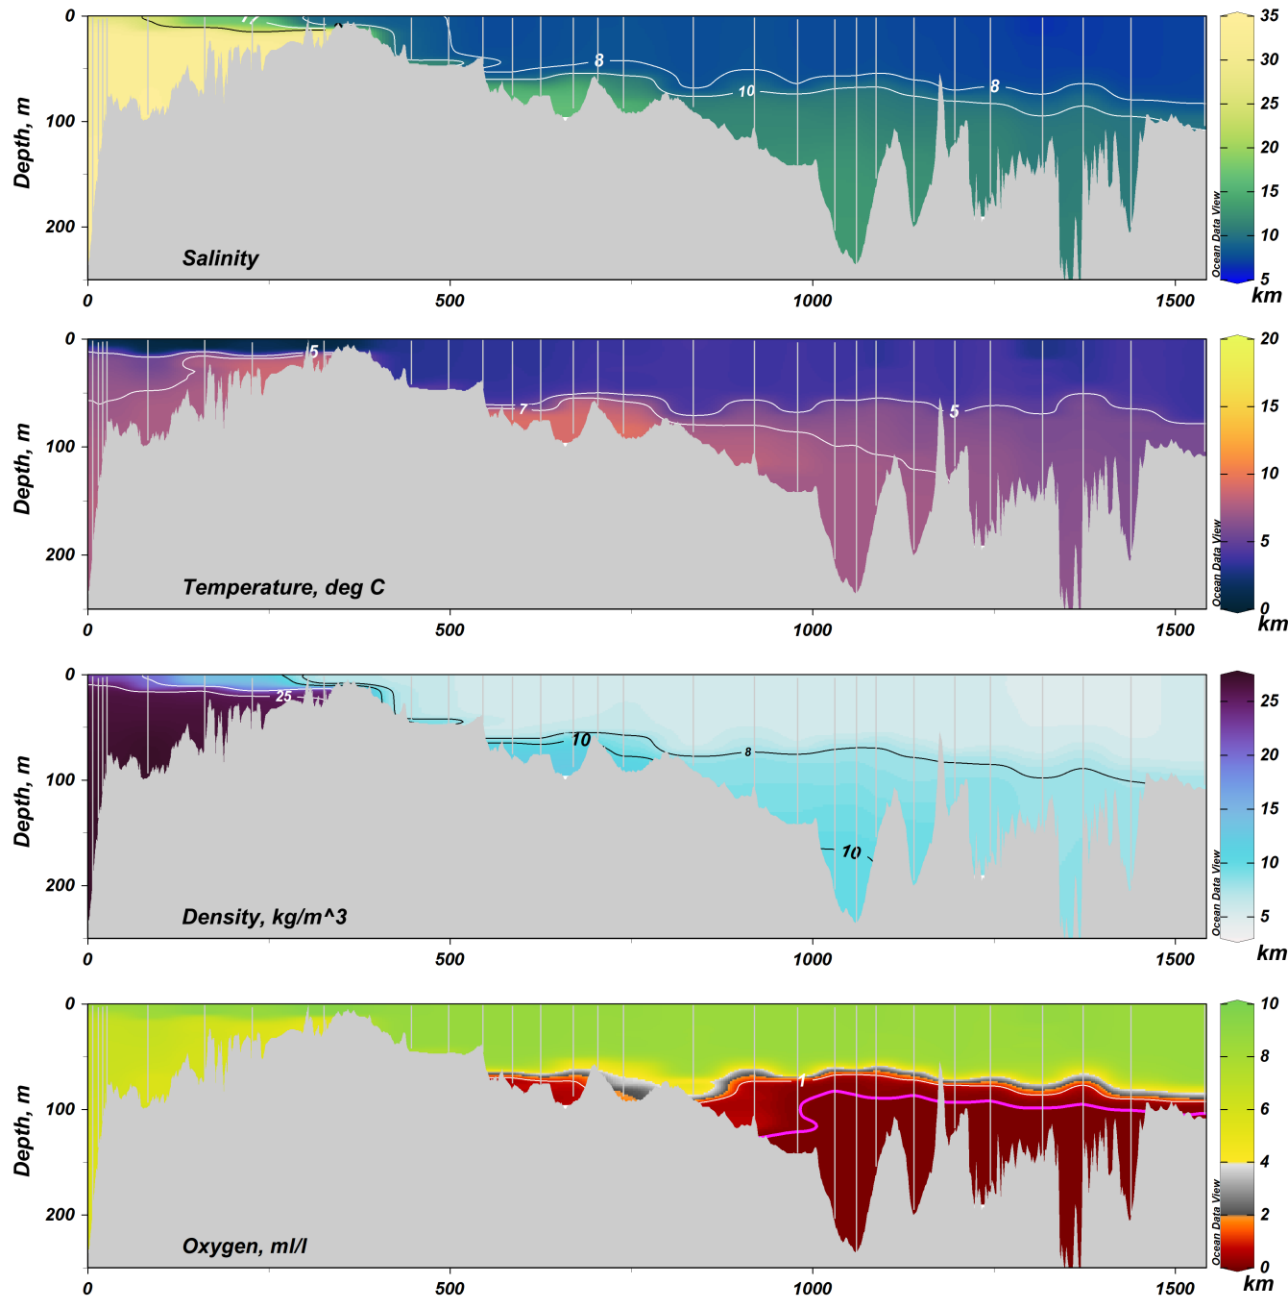

Included parameters are salinity, temperature, density and dissolved oxygen from sensors on the CTD. Only data from SMHI cruises are included, data from the other institutes will be included when a national data host for CTD data is in place and CTD from all institutes are available on a standard format.

Transects are made with ODV (Schlitzer, R., Ocean Data View, <https://odv.awi.de>)
