

Publications by Lars Axell:

Omstedt, A., and Axell, L. B., Modeling the seasonal, interannual and long-term variations of salinity and temperature in the Baltic proper. *Tellus*, 50A, 637-652, 1998.

Axell, L. B., On the variability of Baltic Sea deepwater mixing, *J. Geophys. Res.*, 103 (C10), 21,667-21,682, 1998.

Axell, L. B., and Liungman, O., A one-equation turbulence model for geophysical applications: Comparison with data and the k - ϵ model, *Env. Fluid Mech.*, 1, 71-106, 2001.

Axell, L., Turbulent mixing in the ocean with application to Baltic Sea modeling, Ph. D. Thesis, A66, Dept. Oceanography, Göteborg University, Sweden, 2001.

Axell, L. B., Wind-driven internal waves and Langmuir circulations in a numerical ocean model of the southern Baltic Sea, *J. Geophys. Res.*, 107 (C11), 3204, doi: 10.1029/2001JC000922, 2002.

Omstedt, A., and L. B., Axell, Modeling the variations of salinity and temperature in the large Gulfs of the Baltic Sea. *Cont. Shelf Res.*, 23, 265-294, 2003.

Lensu, M., Cheng, B., and Axell, L., The first implementation of ridging to the ice forecast models of FIMR and SMHI, Technical Report, EU-IRIS, 2003.

Axell, L., Cheng, B., Haapala, J., Vihma, T., and Wang, K., Ridging module parameterisation by analysed ridging data and second version of models, Technical Report, EU-IRIS, 2005.

Cheng, B., Haapala, J., and Axell, L., Final parameterization of ice ridging parameters in the operational ice forecast models of FIMR and SMHI, Technical Report, EU-IRIS, 2005.

Axell, L., Extended Ice Forecast Modelling for the Baltic Sea, Proceedings of the Fourth International Conference on EuroGoos, 6-9 June 2005, Brest, France, p. 531-534, 2006.

Kotovirta, V., Jalonen, R., Axell, L., Riska, K., and Berglund, R., A system for route optimization in ice-covered waters, *Cold Reg. Sci. and Techn.* 55, 52-62, 2009.

Axell, L., BSRA-15: A Baltic Sea Reanalysis 1990–2004, Reports Oceanography, no. 45, Swedish Meteorological and Hydrological Institute, SE-601 76 Norrköping, Sweden, 2013.
